amiltee and by precedent it is understood
a proxies to the convention will only be held
members of the convention from the same

y members of the convention from the same annites as the proxies.

The depublicans of Arizona confidently enterport the campaign at hand asking of Congress of the Administration at Washington admission to the Union of States and the full privice of citizenship to all within the borders of a present Territory, believing that our wealth, omiers, intelligence and rights as citizens of he United States entitles us to such consideration and privilege. All citizens of the Territory he believe in the pure principles of Republicanism and in the complete and full enjoyent of citizenship for every citizen of Arizona ve cordially invited to join the party in an armed attempt to gain a Republican success at its fall elections which will insure to the people of Arizona all the rights and privileges as titleds to which they are entitled.

WILLIAM CHRISTY, Chairman Rep. Cent. Com.

A. Monrond, See'y Rep. Cent. Com.

### THE TERRITORY.

Near the pretty and busy town Benson, in this Territory, stands a unpleasing monument to ignorance, bad judgment, and, if all reports may be believed, dishonesty. I have reference to the idle smelter, which was started dollars today, 884@8714c. thad of the stick as it fell still shakes public confidence. Benson is the entrepot for a wide area of country and it holds the key to a commerce that she will some day use, but I do not think that it is a smelting point. It certainly is not a natural point for the reduction of ores and this idle smelter, rapidly going to rack and ruin, stands in evidence of it. The stories of bad management and rank dishonesty in connection with this property are circumstantial and plausible, but I am rather inclined to the be-lief that the scheme failed from inexpetence of the management and want of judgment in the selection of its location.

The smelting of ores is a peculiar and intricate business, a specialty that requires peculiar talent, unerring judgment and great experience. A good mining man may make a very poor smelter man. The first thing is to get the ores, a permanent supply of them, and then the basis of action can be de-termined. A galena region does not want a smelter working on a copper basis, and yet more foolish things than this have been done by alleged smelting men. Just such ruin dot the mining sections of the West. The smelter that can draw to itself the greatest assortment of ores, so as to mix them to advantage and that has at hand the fluxes and can obtain coke or coal at reasonable rates is the one that will win. One cannot visit Nogales and spend a few days there with eyes open, without being impressed with its geographical location and especially its advantages in relation to the reduction of ores.

THE importation of Mexican ores, lead, gold and silver, is very large. The figures a this connection are attracting attention. It is steadily on the increase, and, under a little stimulation, would grow very quickly. The development of Sonora has scarcely begun. The bulk of these Mexican ores are shipped to the Grant and Omaha people at Denver, to Pueblo, to Sonora has been developed to the Grant and Omaha people at Denver, to Pueblo, the State of le Socorro, and to El Paso. Why should they go by Nogales? It surely would be cheaper to bring coke from Trinidad, dawn grade, than to carry the ore up that steep grade and then way over to the very point where the fuel can be ob-There is no doubt of that, even with the absurd railroad discriminations ontend with. Nogales is not confined to Mexican ores, either. There are many good and more promising prospects in the immediate vicinity of the city on the American side and it can draw on every variety of ore at will and in inexhaustible quantities along the line of the New Mexico and Arizona tailread, with a down grade in its favor all the way. A good smelting outfit could not, in my judgment, find a more promising point than Nogales in all this country at this time.

Good hotels and good restaurants are a blessing to any town, and in the latter expect Tombstone is indeed blessed. The good old camp can justly boast of two of the best restaurants in the Terri-They are not excelled anywhere one such restaurant in Phoenix ald make a fortune in a short time. The traveling man always leaves Tombstone with regret, because of the physical comforts he enjoys there.

HAVE you ever stopped to examine the

THE ARIZONA REPUBLICAN. plat of tropical plants at the Hotel San Xavier, at Tucson? If you haven't you have missed something. It is a rare treat. It is like an oasis in the desert, grateful to the eye that is the desert, grateful to the eye that is weary of sand and alkali and the hot reflection of the sun. Unlike Topsy that garden didn't "just growed" there My friend Heaton expended considerable money, time and muscle in building up that spot and the hours that Mrs. Heaton has spent therein weeding and sprinkling are beyond computation. That was formerly a gulch and it is all made ground and patience and constant attention have been required to develop the plants. The watering of this spot is a matter of some labor. Mr. Heaton has contrived a new devise for sprinkling it. It is not unlike the electric light tower in principle. consists of a high stand-pipe from which is forced a spray that reaches to the farthest limit of the garden. It is a great and dancing hall in California. The dining scheme. Some men might say that it was a lazy man's contrivance. Such men don't know Heaton. He is some of a sleeper, but there isn't a lazy bone in his body. It is not a lazy man's device. It is a stroke of genius and I can see Heaton watching it approvingly.

The Southwest Stockman says the first consignment of coke-about 800,000 pounds-for the Buffalo Mining Company, of Globe, has arrived there. The Buffalo will probably be in full operation by September 1, when the output of copper from Globe will be greatly enhanced. With a railroad into Globe what a boomer she would be!

### THE MARKETS.

New York Stock Market.

NEW YORK, July 21.-The stock market today was dull but firm. The market opened 16th, Sugar refineries were again the most marked feature of the day's oper ations. In the last hour Atchison was attacked and dropped I per cent. The market closed dull and sailing yachts can be had. The fishing is but firm, generally at something better than the finest on the coast. There is a bluff and inopening prices.

Governments firm Petroleum opened with spot at 89 c and August at 89 c. In the afternoon prices declined Baldy, Sierra Madre range of mountains. Terms 'you're and then became steady, remaining so
